

Summer 2009 Firewise Teacher Training

Sponsored by the Minnesota Alliance for Geographic Education (MAGE) and the Minnesota Department of Natural Resources Firewise Program

Featuring Internet Based GIS Wildfire Risk Assessment for Windows PC or Macintosh

*Recipient 2006 National Council for Geographic Education / George F. Cram Award
Recipient 2006 Governor's Commendation - Minnesota Governor's Council
on Geographic Information*

August 12- 14, 2009 - Itasca Community College, Grand Rapids, MN

Who: Middle and High School STEM, Geography, Social Studies, and Science Teachers; Youth and Service Group Leaders.

Why: To engage students in a standards-based, authentic project designed to introduce them to wildfire and wildland/urban interface issues and Geographic Information Systems (GIS). To provide a valuable service to your local fire department, community, and the State of Minnesota.

Teacher Benefits: GIS and GPS training, Firewise curriculum, CEUS and stipend.

Background:

The Minnesota DNR Firewise Program addresses the risk of homes in the wildland/urban interface to wildland fire. As more homes are built in the woods and fields of Minnesota, the existing firefighting resources are less able to protect everyone's property while trying to control a wildfire. Homes close to evergreens and tall grasses of prairies or marshes are most at risk. Making your home able to survive an approaching wildfire is the goal of the Firewise program.

The "Firewise Community Assessment with JavaMaps" project provides a unique, hands-on opportunity for students to use Geographic Information Systems (GIS) technology to assess the wildfire risk of their community and to educate their community on steps that can be taken to reduce that risk.

The Summer 2009 Firewise Teacher Training includes content instruction, technology training in GIS and GPS and field trips to the Minnesota Interagency Fire Center and Forest History Center. Teachers will be prepared to lead students in conducting their own Firewise Community Assessment project.

Registration will remain open until July 30, 2009. For additional information, contact Sara Damon at damons@stillwater.k12.mn.us
