

Downloading and Installing Audacity for Windows

Go to <http://audacity.sourceforge.net/download/windows> and click on Audacity 1.2.6 installer

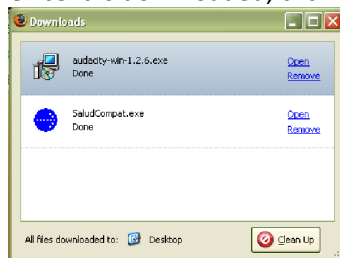

The screenshot shows the Audacity website's download page for Windows. The page features the Audacity logo at the top left and a navigation menu with links for Home, About, Download, Help, Contact Us, and Get Involved. The 'Download' section is active, showing a sidebar with links for Windows, Mac, Linux/Unix, Source Code, and Release Notes. The main content area is titled 'Windows' and includes a 'Recommended Download' section with a link to 'Audacity 1.2.6 installer (.exe file, 2.1 MB)'. Below this is an 'Optional Downloads' section with links for LADSPA plugins, LAME MP3 encoder, VST Enabler, and Plug-Ins. A red circle highlights the 'Audacity 1.2.6 installer (.exe file, 2.1 MB)' link.

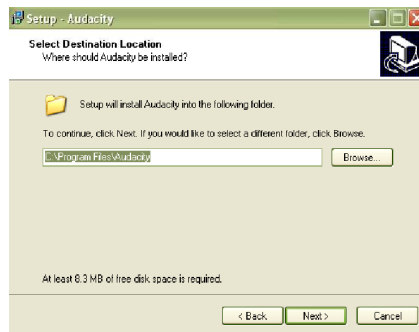

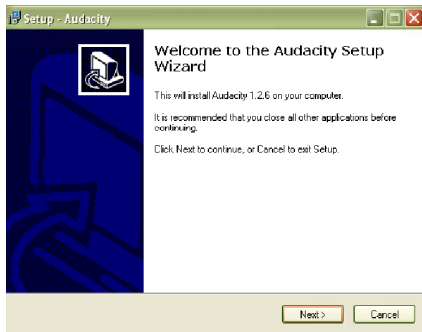

You will be taken to another page, wait there a few seconds until the download box pops up, click *Save File*.

Once it is downloaded, click *Open*

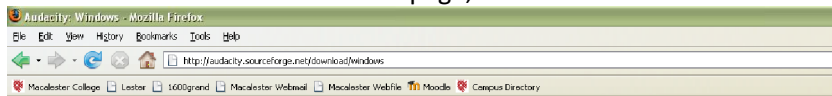

Click through the Set-up Wizard, making sure to install in your programs folder

You're not done downloading and installing yet!

Go back to the windows download page, but this time click on LAME MP3 encoder:

Windows

Recommended Download

[System Requirements](#)

Click the appropriate link below, which takes you to the SourceForge download page - don't "save link as..." or "save target as...". The SourceForge download should start automatically. If it does not, click the links in the orange panel marked "direct link" or "mirror". **Only these links and the automatic download are authorized versions of Audacity.** Disable any automatic download managers if the download is incorrect.

- Windows 98/ME/2000/XP/Vista: [Audacity 1.2.6 installer](#) (.exe file, 2.1 MB) - The latest version of the free Audacity audio editor. See [further information about Vista](#).

Optional Downloads

- [LADSPA plugins 0.4.19 installer](#) (.exe file, 1.5 MB) - over 90 plug-ins.
- [LAME MP3 encoder](#) - Allows Audacity to export MP3 files.
- [VST Enabler](#) - Allows Audacity to load VST plug-ins.
- [Plug-Ins - Download](#) additional effects and filters.

- if you have trouble with your download, or need an older version of Audacity, try our [alternate download links](#) (older versions can be viewed by clicking on the appropriate package).

Then click on LAME download page:

How do I download and install the LAME MP3 encoder?

Because of software patents, we cannot distribute MP3 encoding software ourselves. Follow these instructions to use the free LAME encoder to export MP3 files with Audacity.

Windows

1. Go to the [LAME download page](#).
2. Under "For Audacity on Windows", left-click on the link "libmp3lame-win-3.97.zip" and save the zip folder to anywhere on your computer.
3. When you have finished downloading the ZIP folder, unzip it and save the file **lame_enc.dll** that it contains to anywhere on your computer.
4. The first time you use the "Export as MP3" command, Audacity will ask you where lame_enc.dll is saved.
5. In case of difficulty, please view our [more detailed instructions](#) on the [Audacity Wiki](#).

Mac OS 9 or X

1. Go to the [LAME download page](#).
2. Download either libmp3lame or the version of LameLib for your operating system.
3. When you have finished downloading, use Stuffit Expander to extract the files. (This may happen automatically.)
4. Save the file called "LameLib" or libmp3lame.dylib anywhere on your computer.
5. The first time you use the "Export as MP3" command, Audacity will ask you where LameLib or libmp3lame.dylib is saved.

Unlimited Usenet

On the next page, click the link under *For Audacity on Windows*:

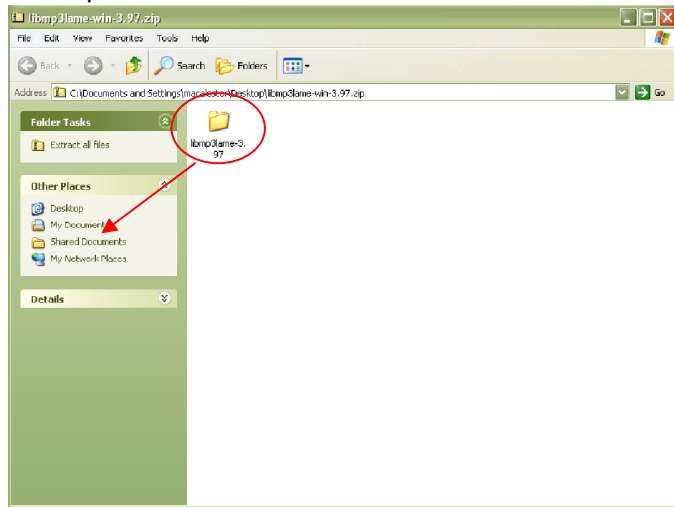

<p>For Audacity on Windows: libmp3lame-win-3.97.zip (Issues? Some help HERE)</p>	<p>FREE PA Just click h Subindex Do you kn</p>
<p>FFmpeg Binary for Windows (THIS IS NOT LAME!): ffmpg (2008/10/17/4win/4osx)</p>	<p>• Check o • Do you l</p>
<p>For Audacity 1.3.3 on Mac OS X (Intel or PPC), or Audacity 1.2.5 on Mac OS X (Intel): libmp3lame-osx-universal-3.97.zip</p>	<p>Do you see</p>
<p>For Audacity 1.2.6 on Mac OS X (PPC): LameLib-Carbon.sit</p>	<p>Do you see</p>
<p>LAME 3.97 for Solaris 10 (SPARC) lame-3.97.pkg.gz</p>	<p>FREE GU Link...</p>

A download box should open, click OK, once it is downloaded, click *Open*

The image shows two overlapping windows from a web browser. The foreground window is titled "Opening libmp3lame-win-3.97.zip" and contains a dialog box with the following text: "You have chosen to open libmp3lame-win-3.97.zip which is a: Compressed (zipped) Folder from: http://lame.sourceforge.net/". Below this, it asks "What should Firefox do with this file?" with three radio button options: "Open with: CompressedFolder (default)", "Save to Disk", and "Do this automatically for files like this from now on". The "Open with" option is selected. There are "OK" and "Cancel" buttons at the bottom. The background window is titled "Downloads" and shows a list of files: "libmp3lame-win-3.97.zip Done", "audacity-win-1.2.6.exe Done", and "SolidCompat.exe Done". Each file has "Open" and "Remove" buttons next to it. At the bottom of the Downloads window, it says "All files downloaded to: Desktop" and has a "Clean Up" button.

It will unzip and show you a folder, click and drag that folder into a memorable location, such as your desktop or documents folder.

You are now ready to use Audacity!! If you have any questions, please contact the HRC.
