

In order to use the Wells Fargo Commercial Electronic Office website on a Macintosh, you must first download and configure the Opera web browser.

## Downloading Opera

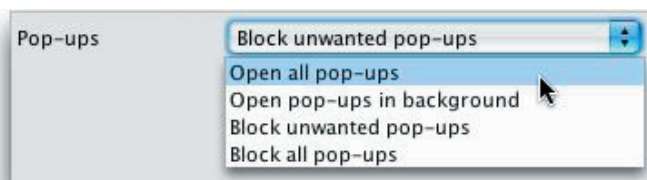

- In the location box of Firefox, type *www.opera.com*
- Click on the **Free Download** button
- Click the **OK** button
- In the Downloads dialog box, click the **Open** link next to the Opera Setup file

- Click the **Agree** button
- Drag the large Opera icon into your Applications folder

## Configuring Opera for Wells Fargo Use

- Double click on Opera in your applications folder
- In the location box, type *www.wellsfargo.com/com/comintro*
- From the Opera menu at the top of your screen, select Opera> Quick Preferences> **Edit site preferences**
- From the Pop-ups options menu select **Open all pop-ups**

- Click on the **Network** tab
- Under "Browser identification", select **Identify as Internet Explorer**
- Click the **OK** button
- Click the **CEO Sign-on** button and proceed (ignore the displayed message telling you that your browser is not supported)

You may also set the Wells Fargo log in page as your home page for Opera. While you are at the CEO Sign-on screen:

- From the Opera menu at the top of your screen, select Opera> **Preferences...**
- In the "Startup" field, select **Start with home page**
- Next to the "Home page" field, click the **Use Current** button
