

Exer 2.1

[A/AS108]

Here is a table about baseball that is in a compact, but non-standard format that doesn't make clear the distinction between cases and variables.

Player	Team	Age	Salary
Pitchers			
Antonio Osuna	Dodgers	26	1050
Andy Pettitte	Yankees	26	5950
Outfielders			
Todd Dunwoody	Marlins	24	222
Sammy Sosa	Cubs	30	9000

- How many variables are there?

- A Two: Pitchers and Outfielders
- B Three: Team, Age, and Salary
- C Four: Player, Team, Age, and Salary
- D Four: Osuna, Pettitte, Dunwoody, and Sosa
- E Five: Player, Position, Team, Age, and Salary

Exer 2.1-1

- How many cases? Exer 2.1-2

- Which of these variables is categorical? Exer 2.1-3

- Which of these variables is quantitative? Exer 2.1-4
