

**Exer 2.6**

[Computation/intro/intro104]

Try the following commands:

```
> x = rnorm(50)
> y = rnorm(100)
> subset(y, x>.2)
```

Why is an error generated?

- A x has not been defined before it was referred to.
- B y has not been defined before it was referred to.
- C x and y are not the same length.
- D subset is not a valid operator.
