

Exer 6.2

[S2008/S2008-fit1]

Which of these statements will compute the sum of square residuals of the model stored in the object `mod`?

- A `resid(mod)`
- B `sum(resid(mod))`
- C `sum(resid(mod))^2`
- D `sum(resid(mod)^2)`
- E `sum(resid(mod^2))`
- F None of the above.

Exer 6.2-1
