

I've graded your notebooks for Experiment 1, and will hand them back in class tomorrow. Most lab teams earned all the points (20/20). The only thing I took points off for was errors in the net ionic equations. However, there were some notebook issues:

- (1) A majority of lab teams did not number and date every page. I consider this to be a big issue! (Come to class tomorrow for why I think this is important.)
- (2) A majority could have described their procedure in somewhat greater detail.
- (3) Some groups could have provided more detailed observations.
- (4) The expectations for the "Conclusion" for Experiment 1 are admittedly unclear. For future wet labs, I will reiterate and/or clarify what the lab manual and my notebook guidelines has to say on this point.

I didn't take any points off for notebook deficiencies this time, but I will for your next wet lab! And we will indeed be back in Olin-Rice 380 this Thursday.
