Article Summaries

For the ten readings marked with an (*), write a summary using the following questions as a guideline. **These summaries should be typed and no more than two pages long. Summaries that are longer than two pages will not receive credit. Please print these summaries double-sided, or use used paper.** They will be accounted for at the beginning of the class period in which the article is to be discussed, graded on a check/no-check basis, and count toward 10 percent of the final grade.

These summaries will help you contribute to discussion of articles and will provide a study-resource with which to prepare for exams.

Author(s):

Title:

Original Source Name, Volume, Date (or other source information):

1. What questions is the author attempting to answer?
2. What are the relevant economic theories or concepts used?
3. What data are used, if any?
4. How does the author go about answering his or her question?
5. What are the paper's main findings?
6. What criticisms of or questions about this paper do you have?
