Software Engineer (20 hours a week during school, 40 hours a week over summer)

**Position Information**

**Employer:**
Maverick Software Consulting

**Division:**
N/A

**Title:**
Software Engineer (20 hours a week during school, 40 hours a week over summer)

**Description:**
Let us pay you to get real world software development experience while you take classes. This experience is what employers are looking for. We've worked with over 160 students in the last 4 years. All 160 students have full-time jobs in the IT Industry. We have helped students get full-time jobs at Microsoft, IBM, HP, Intel, etc.

Maverick Software Consulting is looking for talented and highly motivated students to work with leading edge Information Technology professionals at Digital River from our office at 1229 Harmon PI, Minneapolis, MN.

- $13.50 per hour.
- Provides training to help bridge the gap between what is taught and what an entry level software engineer really needs to know.
- Real world software development and testing experience. Not doing "busy" work. We are part of the development and testing teams at our clients.
- Flexible schedule - employees set their own schedules.
- Free soda and coffee.
- Fun, easy going work environment.
