

Home and workplace visits

Exams, labs, blood draws, and x-rays all in the comfort of your home.

Nice Healthcare offers home and office visits to eligible individuals. All of our visits start online and about 60-70% of all conditions are treatable through online care. However, when you're in need of a lab, x-ray, or an in-person assessment Nice Healthcare will send a medical provider to your home or office letting you leave your worries of having to drive to the germ clinic, take PTO or use sick hours behind.

Once you schedule a virtual visit, the Nice Healthcare provider will assess your condition and then determine a home visit is needed. If so, a care coordinator will work with you to find the best time. During an in-person visit, Nice Healthcare may conduct a lab or simply do a physical assessment making sure your heart rate is normal, and lungs are functioning properly, in addition to any other required physical exams.

How it works

 **Cost:** Each home visit is either free or up to \$5. Check with your HR team or send a message in the Nice app for more information on cost.

 **How to schedule:** To schedule an in-home exam, begin by scheduling a virtual visit through your Nice Healthcare account. It's easy and simple and only takes a couple of minutes!

June is Pride Month!

At Nice Healthcare we strive to make everyone of all gender identities and sexual orientations feel comfortable, welcome, and understood.

One way we do this is by asking patients to share their pronouns and/or name with us so that we can refer to you the way you prefer. You can do this by sending us a quick message in the chat or putting it in the notes when you schedule your first visit.

We'll document your preferences so that no matter which provider you see, they'll always have that information handy. If it makes you feel more comfortable, you can choose to see the same provider each time you use Nice's services. Simply select their calendar when you schedule a visit.

CARE TEAM SPOTLIGHT

Elizabeth Chidothe, FNP

"What I enjoy most about what I do at Nice Healthcare is being a part of a company that is truly making healthcare affordable while also making it an awesome place to work. Any role I play in brings me immense gratification."
