

Nice's POPS Diabetes Management Pilot

Starting 4/1/2021, Nice will be partnering with Pops Diabetes Care to offer additional support to our diabetic patients in the way of simple technology. This pilot will run through March 31, 2022.

How do I enroll in the pilot?

Complete a virtual visit with a Nice provider

Once you've been approved to participate, you will receive communications regarding sign-up via the Nice chat and will also have supplemental documents uploaded to your account.

Download the POPS Diabetes app from the QR code on the uploaded document or through the app store.

Once the app is downloaded, go through the sign-up process using your unique sign-up code which will be provided on the document uploaded to your account.

After signing up, your rebel meter will be delivered within 5-7 days.

How does the pilot work?

Pops offers one of the most discreet, easy to use diabetes management systems available. Pops' virtual care system is patented, FDA cleared and makes managing diabetes easier and more convenient than ever.

Patients participating in the Pops pilot program will receive a Welcome Kit that includes:

- Rebel glucose meter
- 8 foil packages of Rebel meter lancets
- 2 of each, sizes 1-4
- Magnets for phone attachment
- Instruction manual
