Depicting Sea Level Change in the Ganges River Delta, Bangladesh

Quinn Frankovsky
Quick Summary
- Base of Himalayas
- Ganges River Delta
- Vulnerability

Hypothesis
- Due to climate change effects
  + vulnerable geography = land loss
Quick Summary
- Base of Himalayas
- Ganges River Delta
- Vulnerability

Hypothesis
- Due to climate change effects
  + vulnerable geography = land loss
Methods

- NDVI Classification
- Layer Stack Composition
Rationale:
- White = overall net land loss
- Black = overall net land gain
Layer Stack Composite
Conclusions

- Hypothesis proven?
- Methods - NDVI Classification, Layer Stack Composition
- Mangrove Forest vs rural settlements
- Considerations of results
