Notification of Surveys for Student Class Projects

To be completed by faculty members by the end of the second week of the semester.
Students mentored by faculty members who submit this form do not need to submit separate applications for their projects to the Survey Coordination Committee.

Please indicate your name, department, and email address.

For each class you have assigned survey projects for this semester, please indicate:

Class title
Number of unique survey projects to be conducted by class members
Students’ strategies for obtaining samples (If unknown, please indicate the advice you will give to students about how best to obtain their samples.)
Estimated number of subjects to be contacted per project
Estimated desired number of respondents per project
Dates or approximate timing of the data collection phase of the projects.

Please submit this information by the end of the second week of the semester to the Survey Coordination Committee.

The Survey Coordination Committee appreciates your help. You are enabling us to gain a fuller picture of the number of surveys conducted on campus and the degree to which students may be asked to participate in surveys. The SCC may contact you to discuss options for sampling that help reduce the number of surveys Macalester students are asked to complete in a semester.
