

CELL PHONE PLANS IN THE U.S.

Landline:

Before you get a mobile phone plan, get a landline for your room from Macalester ITS (Mac requires a phone number in your student record) so that your mentors can reach you.

Mobile phone systems in the world:

System	Comments	Carrier
GSM	If you have an unlocked GSM phone at home and you just want a US SIM card, stick with GSM carriers	AT&T, T-Mobile
CDMA	CDMA phones don't always use SIM cards	Spring, Verizon

Types of plans

Type of plan	How it works	Advantages	Disadvantages
Pre-paid	You "refill" your phone plan daily or monthly, without which you don't get service.	You don't have to commit to a contract, which means you can stop refilling your plan whenever you are out of the country. You can also change the plan at any time.	Doesn't come with a device.
Individual contract	Usually 2-year contract with early termination fee, monthly bill, and option to buy phones at discount prices.	Usually cheaper in the long-run, you can usually get a device for free or heavily discounted.	You have to commit for at least 2 years, requiring cash flow to pay every month.
Family contract	A group of friends or acquaintances can form a "family" for phone plan services and initiate a group plan together, where you share the	It gets cheaper if you have more folks involved.	You rely on friends/acquaintances' ability to get together and organize, as well as pay bills on time. You also share your data/minutes which can be unbalanced. You also have to ommit for at least 2 years, requiring cash flow to pay every month.

Plans by main carriers

(as of Fall 2015) *Note, plans are prices subject to change by individual carrier*

	Non-GSM Carriers		GSM Carriers	
Carrier	Sprint	Verizon	AT&T	T Mobile

Unlimited international texting (limited countries)		✓	✓	✓+\$10/mo for unlimited international calling
Shared data starts at	Shared 20GB	Shared 10GB	Shared 10GB (unused data rolls to next month)	Shared 10GB
No contracts or Early Termination Fee	✓			✓

Carriers' stores

- Sprint
- ATT
- T-Mobile
- Verizon

*You can also visit Target, WalMart, Best Buy stores for more information besides visiting the carrier's store.

Notes:

1. Don't ask your host family to join their family plan (that's rude). If they make the offer, that's great.
2. Phones sold in the U.S. are locked to the carrier that sells them, so you couldn't take a GSM iPhone from AT&T and use it on T-Mobile's network unless the phone is unlocked. However, many Verizon smartphones come unlocked.
3. Each carrier has options for voice, text, or data that gives you certain amount of usage and fees for when you go over your limits. If you are not on unlimited voice or text plan, US carriers may charge you for outgoing and incoming call minutes or texts.
4. To check coverage map, enter in Mac's zip code - 55105.
5. Plans change often so check the carrier's website for updated cost and information.
