"Macalester College,

MINNESOTA.

1889-1890."
Macalester College
Minneapolis, Minnesota
1855-1869
Christus in Omnibus, Lex et Lux.

Macalester College opened Wednesday, Sept. 16, 1885, under Presbyterian control.

It aims to secure thorough education in the Classics, in the Sciences, in Modern Languages and in Literature, through experienced teachers, and under positive religious influences.

Denominational, but not sectarian.

Those entering the Junior Class in this department are supposed to be well prepared in studies of a lower grade. (See requirements for admission). After completing the work of this class, students are advanced to the Ancient Classical Course or to the Modern Classical Course, the classics in the former being Latin and Greek, and in the latter, Latin and German; in all other respects the studies are the same in both courses. By this arrangement students may choose either Greek or German, both of which are now introduced, and are carried forward throughout the curriculum.

*The Preparatory Department of said Macalester College shall be known as the Baldwin School.*—Charter.

† Figures in parentheses show the number of recitations per week. Each recitation forty-five minutes.

CATALOGUE OF COURSES OF STUDY.

The departments of study herewith presented are the Preparatory and the Collegiate. Thirty-six weeks, exclusive of vacations, constitute a year's study.

I. The Preparatory Department covers a period of three years, and is arranged to meet all requirements of thorough preparation for either of the Collegiate Courses. There are introduced at the beginning of the Middle Preparatory two courses: the Ancient Classical and the Modern Classical. German in the Modern Classical is made the equivalent of Greek in the Ancient Classical. These courses run parallel throughout the curriculum, and furnish attractive and rare opportunities for proficiency in their prescribed studies.

Students are admitted to this department and assigned to such classes as their examinations determine; and all students in this department are under the special oversight of the Faculty, with the view of helping them to fixed habits of study, and of securing their greater proficiency in the branches studied. Those completing the studies of this department pass regularly and without examination into the Collegiate Department.

II. The Collegiate Department, like the Middle and Senior Preparatory, is divided into the Ancient Classical and Modern Classical. These courses are maintained until the close of the second term of the Senior year. No variation either from the Ancient Classical or Modern Classical, is permitted during the Freshman and Sophomore years. In the Junior, and first and second terms of the Senior year, the electives are as follows: Mathematics, Greek, Latin, German, French, and Laboratory work. Election of the desired course being made at the beginning of the Junior year, the student must pursue the studies of that course without change.

No class in Elective Studies will be formed with less than four members.

The following distinctive features of the prescribed course are worthy of note:

1. Students in the Ancient and Modern Classical courses have the same advantages in Mathematics, in the Sciences, in History, and in English.
2. The Bible and English (including Anglo-Saxon) are made prominent features throughout the course.

3. Natural Science is introduced in the Freshman year, and continues throughout the course.

4. Mental Science is introduced in the third term of the Sophomore year, in which a careful general view of the science is given, as needful preparation for the thorough mastery of the subject in succeeding terms.

5. The last term of the Senior year is devoted almost exclusively to Sciences, Literature and Philosophy.

III. Arrangements are being made to give instruction in the Scandinavian language to Scandinavian students who may desire such instruction in addition to either of the foregoing courses of study.

REQUIREMENTS FOR ADMISSION.

1. Testimonials of good moral character are required of all students at their entrance into either department of the College.

2. Applicants for the Junior Preparatory are required to pass an examination in Orthography, Descriptive Geography, Arithmetic to Compound Numbers, and elements of English Grammar.

3. Applicants for the Freshman are required to pass an examination as follows:
   - MATHEMATICS.—Arithmetic completed, Algebra to Quadratics, and Geometry (four books).
   - ENGLISH.—Grammatical Analysis, Word Analysis, and Elements of Rhetoric.
   - HISTORY.—United States' History, General History, (Swinton's, Anderson's, or their equivalents).
   - PHYSICAL GEOGRAPHY.—Cornell's, or its equivalent.
   - LATIN.—Three books of Cæsar, four Lives of Nepos, four books of Virgil, and three Orations of Cicero, or their equivalents.

4. In addition to the above, applicants for the Ancient Classical are required to pass an examination in Greek, as follows:
   - Lessons, three books of Anabasis, twenty lessons of Jones' Prose, or their equivalents.
   - Applicants for the Modern Classical are required to pass an examination in German, as follows:
     - German Grammar and Whitney's or Adler's Reader.
5. Applicants for more advanced classes are required to pass an examination in the studies, or their equivalents, of the lower classes.
6. Applicants deficient in some studies will be given opportunity to make up what will secure full class standing.
7. Due consideration will be given to the certificates of grades and diplomas brought by students from High Schools, Normal Schools and Academies.

PARTICULAR DESCRIPTION.

RELIGIOUS INSTRUCTION, APOLOGETICS AND ETHICS.

THE PRESIDENT.

The Gospel Narrative and History constitutes the scope of Biblical Instruction in the Preparatory Course, from the beginning to the first term of the Senior year. An analysis of the Gospel History is now introduced and limited to the Senior Preparatory.

In the first term of the Junior Collegiate year Christian Ethics is begun and continued through the second term. The textual study of the subject is supplemented with lectures.

The first and second terms of the Senior year are devoted to Christian Evidences. By critical study of the text-book, by lectures on particular evidences and by historic review, the stability and growth of the Christian system are shown in contrast with the corruption and decay of false systems of religion. Special attention is given to the harmony of Science and Religion.

HISTORY, ENGLISH LITERATURE AND POLITICAL SCIENCE.

PROFESSOR NEILL.

Prominence is given to historical and economic topics with such knowledge of English Literature as will lay the foundation for a broad culture. While text-books are not altogether discarded, the student is taught, as in Harvard and the University of Michigan, chiefly by lectures, the required preparation and examination of note-books and the writing of theses on assigned topics. During the Senior year particularly attention is given to Constitutional History, and the decisions of the United States' Supreme Court since the last amendments to the Constitution.
ENGLISH.

PROFESSORS PEARSON AND WALLACE.

The study of Rhetoric continues through the Freshman and Sophomore years. The constant aim is to give facility in writing and speaking, and to encourage students in a critical study of the English classics. In connection with the Art of Discourse essays are required each week. The criticism of essays forms a special feature, with a double view of leading students into the use of good English as well as into habits of careful, intelligent thinking. The first and second terms of the Junior year are then given to Anglo-Saxon in which selections from the Gospels, Caedmon and Beowulf, are critically read after the same method as that employed in the study of Latin and Greek. Attention is constantly directed to the contributions Anglo-Saxon has made to our own tongue, in words, phrases, idioms, syntax, etc. Following this, one term is devoted to a general view of Early and Middle English, with critical study of selections from Layamon, Ormin, and other authors. This prepares for the course in English Literature described elsewhere.

MENTAL SCIENCE AND LOGIC.

PROFESSOR KIRKWOOD.

Study in this department begins with the third term of the Sophomore and continues to the end of the Senior year.

The subjects studied are the Cognitive and Motive Powers, Formal Logic, the Intuitions, the History of Philosophy and Physiological Psychology. In the study of the Cognitive and Motive Powers, due regard is paid to the Physiological element, though the special study of that element and the theories of Wundt, Fechner and others is reserved to a later period in the course.

The aim throughout is to enable the student to acquire skill in observing and analysing his own mental operations and their relations to the physical system, together with a fair understanding of the laws which govern them, and as full knowledge of the doctrine of Intuitions and of the growth and characteristics of the various systems of Philosophy, Ancient and Modern, as the time at command will permit.

DEPARTMENT OF NATURAL SCIENCE.

PROFESSOR FORBES.

Physics is studied during the Sophomore year. The instruction is gained from text-books and lectures. The collection of Philosophical apparatus is new and of the most approved kind. It has
been carefully selected for the purpose of experimentally illustrating the fundamental principles of Mechanics, Hydrostatics, Hydraulics, Pneumatics, Acoustics, Heat, Light, Magnetism and Electricity. The Physical Laboratory is large and conveniently arranged; and all students, who desire, have opportunity afforded them for laboratory work, thereby enabling them to become familiar with the use and manipulation of the apparatus.

Chemistry is taught in the Junior year. The first term is devoted to the general study of the subject. Special attention is given to the history of the science, the specific properties of the non-metallic and the metallic elements, the subject of chemical affinity, nomenclature, the use of chemical symbols, atomic weight and quantivalence. The collection of chemical apparatus is well adapted for the experimental illustration of the subject, and facilities are afforded the students for laboratory work.

Qualitative Chemical Analysis. The second term of the Junior year is devoted to this subject. Our chemical laboratory is specially arranged for this work, being fitted up with modern appliances. A set of re-agents and all needful utensils are supplied to each table.

The students are required to keep carefully prepared notes of the details of their laboratory work.

In connection with the chemical laboratory there are conveniently arranged dark rooms for work in Photography; and in the main college building there is a sky-light for photographic exposures.

Physiology and Hygiene are taught specially with reference to their practical bearing.

In the Preparatory Department, the instruction has particularly in view the deleterious influences resulting from the habitual use of stimulants and narcotics. In the College Department, Physiology is studied from a scientific standpoint, and in this connection the subject of Sanitary Science receives particular attention.

Botany, Zoology and Geology. In these studies laboratory and field work are pursued as far as practicable. In Botany the text-book is used as a guide. Students are expected to make collections of typical plants illustrative of its teachings. They will also be taught to mount and classify plants for the Herbarium. In Zoology a similar course is pursued. The study of specimens in hand and the dissection of typical forms are made a feature of the work. In Geology the text-book is supplemented with field work for the collection and classification of minerals, rocks and fossils.
In these branches of study the students are taught the use of the compound microscope and the preparation of objects for the same.

The instruction in the department of science is concluded by a course of lectures on the general subject of Biology.

Early in the course the students are taught Free-hand and Perspective Drawing, and encouraged to make use of this knowledge in their scientific work and investigations.

Latin Language and Literature.

Professor Pearson.

Throughout the early years of the course, analysis and synthesis, both of words and sentences, are considered indispensable. Special emphasis is put upon the Etymology and Syntax of the language that the student may acquire facility in translating accurately and fluently into idiomatic English. In connection with the poets, Prosody is made prominent. Throughout the course such readings, dissertations and essays are required as will lead students into a careful study of the Literature and History of the Roman people, emphasis being placed upon the manners and customs, political and intellectual development, as well as their relations to other historic nations and times. Reference is had constantly to the studies that are pursued simultaneously that the work may be as nearly unified as possible.

Greek Language and Literature.

Professor Wallace.

Greek is a cardinal feature of the Ancient Classical Course. The general aim is to study critically some of the masterpieces in each of the great departments of Greek Literature:—History, Oratory, Philosophy and Poetry.

During the first two years (middle and senior preparatory) there is a recitation daily after this method. An earnest effort is made to master the Anabasis special attention being given to the acquisition of a large vocabulary. Then follows in the Freshman year the Dialogues of Lucian, prose composition and sight-reading in the Gospels.

Three terms are then given to Ionic Greek—Homer and Herodotus—in connection with which the habits, customs, political and religious ideas of the early Greeks are carefully noted. In the study of oratory, besides the attention ordinarily given to Demosthenes, at least one oration of Lysias and one of Isocrates is critically
CATALOGUE OF

read in the original, or in English, and a general view of the development of Greek oratory is presented. The same plan is pursued in the study of the philosophical writers and the poets.

As most of those who elect Greek have the ministry in view, the Senior year is devoted largely to the Greek Testament, the aim being to read carefully all of St. Paul's Epistles.

To give the student some acquaintance with Greek as now spoken and written, a few recitations are devoted to sight reading in newspapers of current date, published in Athens.

The Hadley-Allen grammar is used for drill, and constant reference is made to Goodwin.

Throughout the course, collateral reading in the histories of Cox, Smith, Grote, Curtius, and other standard authors, is prescribed.

GERMAN LANGUAGE AND LITERATURE.

German is the distinguishing feature of the Modern Classical Course and runs parallel with the Greek of the Ancient Classical. The aim is to master the language both as spoken and written, and to attain a good measure of familiarity with German Literature. Accordingly, to the careful study of German and the reading of German Classics is added a thorough course in conversational exercises.

In the first years the grammar is completed. The next years are given to reading Grimm's Fairy Tales and Prose Composition. Then follows the critical study of the classic authors, Lessing, Schiller and Goethe. The course closes with a general survey, by means of text-book and lectures, of the entire field of German Literature.

FRENCH LANGUAGE AND LITERATURE.

French is introduced as an elective in both the Ancient and the Modern Classical courses at the beginning of the Junior year. As students have then made large attainments in Latin, it is believed that much facility in reading and even in speaking the French language may be attained in the time allotted to it. The method of study is the same as that pursued with the German—a combination of the natural or conversational with the scientific.

BIBLICAL HISTORY AND LITERATURE.

The Bible has been given a central place in the College Curriculum. It is deemed by the founders of the College the most instructive book to be found in the whole range of literature, in biography, in
history, in widely varied passages of unrivaled literary beauty, both in poetry and in prose, in the revelation of a perfect Law and a perfect Gospel, of a perfect Law-Giver and a perfect Saviour, in the culture of a manly character and a noble life. It will be the aim of this department to aid the students in understanding and appreciating the manifold excellences that have secured for the Bible the title of "The Book."

**MATHEMATICS.**

**Professor Boyd.**

**Preparatory Department:**

(A.) In the Junior Preparatory, there are four exercises a week during the year in Arithmetic.

(B.) The Middle Preparatory, taking up Wells' University Algebra, have five exercises a week throughout the year, completing Radicals.

(C.) Beginning with Quadratic Equations, the Senior Preparatory Class recites four times a week during the first term, completing to theory of Equations. During the second and third term the class recites four times each week in Wentworth's Revised Geometry, completing the first six books.

**The Collegiate Department:**

(A.) During the first term in the Freshman year, the class have five exercises a week, completing Plane and Solid Geometry. Accompanying the text-book work many exercises in Mensuration are required of the class. Algebra is completed in the second term. The class recites five times a week. The text-book work is supplemented with lectures on the Theory of Numbers. During the third term there are four exercises a week in Plane Trigonometry.

(B.) In the Sophomore year during the first term there are four exercises a week in Spherical Trigonometry. The second term is occupied by the study of Analytical Geometry, the class reciting four times a week. During the third term the studies are Surveying and Navigation, which together recite three times a week. Field work in Surveying is required of the class.

(C.) During the Junior Year five lessons a week are given to Analytical Geometry and the Calculus. Mathematics is elective and the studies for the first and second terms are Analytical Geometry and Differential Calculus; for the third term Integral Calculus. Newcomb's Analytical Geometry and Bowser's Calculus are used.

(D.) The elective in Junior Year runs through the first and second term of Senior Year, reciting four times a week. For the first term the elective study is Mechanics; for the second the Mechanical theory of Light, Heat and Magnetism.
YOUNG'S GENERAL ASTRONOMY.

Is a required study during the second and third terms. The subject occupies three hours a week in the second term, and four hours in the third term.

In this department an effort is made to avoid routine work as much as possible by giving original exercises to which the student is to apply the principles he has already learned.

OPTIONAL COURSE.

An optional course of one or two hours a week during the next year will be given, a plan only partially accomplished this year. The object of this optional is to broaden the students' ideas of the mathematical world by giving a general and complete discussion of the Theory of Numbers, and by introducing as many as possible of the modern ideas recently discovered.

In the Theory of Numbers the right of the positive Integer, negative Integer, Fraction, Irrational and Complex Numbers (a+ib) to constitute the family of numbers is established, and the Fundamental laws governing the Fundamental operations ordinarily performed on these numbers are developed. Also the general proof that every Algebraic Equation has a root, a theorem the truth of which is assumed in all common algebras.

GENERAL INFORMATION.

LOCATION.

Macalester College is located midway between the business centers of the cities of Minneapolis and St. Paul, and within one and a half miles of Merriam Park. The Chicago, Milwaukee and St. Paul Railway passes within three-quarters of a mile of the College building. The location is beautiful and commanding. Minneapolis is in full view from the College grounds, and a short walk to the east of the College grounds brings St. Paul into view. On the east of the College is Snelling avenue, on the north is Summit avenue, or the completed boulevard, two hundred feet in width, from Minneapolis to St. Paul. Being about five miles from the business centers of the Twin Cities, it is, by the cars, a ten minutes ride to either. There are no saloons or other temptations to immoral habits present. All of the advantages of the city are had, without any of the disadvantages. The healthfulness of the climate is unsurpassed.
ACCESS.

Access to it is had by means of the Chicago, Milwaukee and St. Paul Railway. The trains stop at Macalester Station, the point where Snelling avenue intersects the railroad. An electric motor runs near the College, from St. Paul to the Mississippi river.

Special rates of travel on the C. M. and St. P. Ry., are furnished students from either city. These allow students to board at home and easily avail themselves of superior advantages for a thorough collegiate education.

CHARACTER.

The character of the College is religious, under Presbyterian control. It aims at Higher Christian Education, theoretical and practical. The cardinal doctrines of the Christian religion will be firmly maintained, but denominational preferences will not be interfered with. We accept the trust of young men committed to our care, and will carefully guide them in paths of literature, science and religion, and guard them against any habit not in keeping with the highest standard of manly character and moral excellence; and, with Divine help, we will seek to realize our aim in thoroughly educated Christian young men.

HOME.

Students will find a home in the Dormitory, and social advantages in the families of the Faculty.

The Dormitory contains twenty double rooms, each designed to accommodate two students. They are heated with steam, and are furnished with ample and substantial furniture.

The general management of the Dormitory belongs to the Board of Trustees, and its government and discipline belong to the Faculty. The boarding is under the direction of the Matron, who, with suitable help provides good boarding at rates as near to actual cost as can be ascertained.

GOVERNMENT.

Students are expected to deport themselves as gentlemen, and conform to the prescribed rules of government. Diligence in the hours designated for study is required. Abundant facilities for wholesome exercise and recreation are given. No student is permitted to waste his time and money in habits of indolence and prodigality.

Students in the Collegiate Department are permitted to visit either city on the holiday of each week. Visitations of the cities at night and going to or returning from the cities on the Lord's Day must be by permission of the Faculty.
Students in the Preparatory Department are required to obtain permission from the Faculty before leaving Macalester for Merriam Park, or either of the cities.

SPECIAL REGULATION. The use of tobacco is discouraged, and is prohibited in and about the College Buildings.

RELIGIOUS SERVICES.

Devotional services begin the college work of each day, at which all the students are required to be present.

Public worship is held every Sabbath morning, followed by a Bible lesson in classes, attendance upon which is expected of all students except those boarding at home, and those excused by written request of parents or guardians to worship elsewhere.

There is an active and flourishing branch of the College Y. M. C. A. which has proved to be an agency of great spiritual power among the students. Its meetings are held every Sabbath evening, and the College prayer meeting is held every Wednesday evening, to both of which all are invited.

LITERARY SOCIETIES.

Three Literary Societies are in successful operation. These are the Hyperion, the Academian and the Parthenon. The Hyperion is for the College classes whose students are required to unite with it for improvement in literary exercises. The other societies are for Preparatory students, and it is expected that they will become connected with them, and faithfully improve the advantages they afford.

LIBRARY.

During the past year about 900 volumes in art, science and literature were added to the library, making the aggregate number of volumes about 5,000. Valuable additions are constantly made to these as rapidly as possible. For the increase of the library, contributions in books and money are solicited. "Each person giving five hundred or more books shall have his name attached to one of the alcoves."

Mr. James J. Hill, of St. Paul, has given five thousand dollars for a Reference Library, on condition that a fire-proof building within three years is erected, and that the library under proper regulations is open to all investigators.

READING ROOM.

To provide increased facilities for the growing demands of the College, the Board of Trustees has erected the main building of the College, in which provision is made for ten large class-rooms, and
additional rooms for a museum and for literary societies. The base-
ment of this building is equipped for a gymnasium, where sufficient
opportunities are given for needed exercise, under a competent
instructor. The west wing as exhibited in the cut is yet to be erected.

**MAIN BUILDING AND GYMNASIUM.**

A commodious Reading Room has been fitted up and liberally
supplied with good reading matter. The following papers and
magazines are on file: Pioneer Press, Globe, Minneapolis Tribune,
Harpers' Weekly, Public Opinion, Journal of Education,
Literary News, New York Independent, Scientific American, North-
western Presbyterian, Interior, Herald and Presbyter, Presby-
terian, Presbyterian Journal, Evangelist, Presbyterian Banner,
Science Monthly, Atlantic Monthly, Andover Review, Missionary
Review, New Engander, Christian Thought, Eclectic, O. T. Stu-
dent, Education, Our Day, Nineteenth Century, Contemporary Re-
view.

Besides liberal contributions made by the professors and by friends
living in the vicinity of the College, a considerable sum was realized
from the following course of lectures:

Henry L. Moss, Esq., "The Moor in History;" Rev. David J.
Burrell, D. D., "Thinkers of To-Day;" Rev. Robert F. Maclaren,
Judge E. Torrance, "Pennsylvania Reserves;" Rev. John A. Stemen,
"Life's Visions and Tasks;" Rev. Robert M. Donaldson, "The Mis-
ion of Music;" Prof. James Wallace, "From Sunium to Parnassus."

**TEXT-BOOKS.**

Arrangements are made whereby text-books and stationery are
furnished to students at reasonable rates.

**EXAMINATION.**

Written examinations are held at the close of each term, and the
class standing of each student is fixed according to his grades in the
branches studied. A record is kept of each student's grades in
scholarship and deportment, a copy of which is sent to his parents
or guardian.

**THE RANKING SYSTEM.**

I. DUTIES OF INSTRUCTORS.—Each Professor, after comput-
ing from recitations and examinations the grades of his classes, shall
report them to the registrar, and also the rank of each student as
determined by the following plan:
(a) Each class in REQUIRED studies shall be divided by the instructor into four classes or groups, numbered in order of merit.

Group I shall contain not less than one-tenth and not more than one-third.

Group II shall contain not less than one-seventh and not more than one-half.

Group III shall contain not less than one-sixth and not more than one-half.

Group IV shall contain the remainder of the class, except those not fully examined.

(b) Each instructor of an elective class shall report to the registrar in which of the above-mentioned groups the members of his class shall be ranked, having regard to the proportions of the several groups into which the entire required class is divided.

II. DUTIES OF THE REGISTRAR.—(a) The registrar shall compute the general group-number of each student by combining his group number in the general studies in proportion to the schedule time of the respective studies. (b) The First General group shall include those students whose average does not exceed 1.5. The Second General group shall contain those whose average exceeds 1.5, but does not exceed 2.6.

Those whose average exceeds 2.7, but does not exceed 3.6 shall constitute the Third General group. The Fourth General group shall include all those whose average exceeds 3.6, except those not fully examined.

III. REPORTS.—The report shall state:

1. The General Group names of the students.
2. His group numbers in each study.
3. Disorder marks, and both excused and unexcused absences.

The report shall also include an explanation of the significance of the group numbers.

NOTE.—Standing: The First Group indicates very high standing; the Second Group indicates high standing; the Third Group indicates medium standing; the Fourth Group indicates very low.

IV. RANKING AND HONORS OF THE GRADUATING CLASS.—(a) The final rank of members of the graduating class shall be determined by combining the averages for the Sophomore, Junior and Senior years, provided that the student's grade for the Sophomore year shall not be prejudicial to his standing in competition with students entering Junior years. (b) A student entering Junior year, and completing the Junior and Senior years shall be
allowed to compete for honors. (c) The First Group thus determined shall be THE HONOR GROUP. The names to be printed in alphabetical order.

V. HONORARY ORATIONS.—Honorary orations shall be awarded by a vote of the Faculty, taken by ballot, and the basis of choice shall be the special excellence of the student in any department of study.

NOTE.—A professor in grouping his class, in case he finds fractions, when seeking the limits of any given group, shall count a fraction greater than a half equal to a unit.

DEGREES.

Graduates from either of the Collegiate Courses receive the degree of A. B.

EXPENSES.

Boarding in the Dormitory is three dollars per week.

Rooms in the Dormitory are furnished with bedsteads, wire beds, mattresses, pillows, bureau, wash-stand, table, chairs, book case, heat and light, at fifty cents per week per student. Washing in the laundry fifty cents per dozen pieces. A Laboratory fee of five dollars is charged to students for materials used by them in Laboratory work.

BEDCLOTHING.—Students entering the Dormitory will provide themselves with all articles of Bedclothing except pillows and bolster.

Boarding in private families from four to four and one-half dollars per week.

RATES OF TUITION.—All candidates for the ministry have tuition provided for them, according to the action of the Board of Trustees, which requires:

(A.) That candidates for the ministry shall be under the care of Presbyteries, or shall have their purpose to enter the ministry certified by their pastors and Church Sessions.

(B.) That such students shall execute and give to the Treasurer of the Board of Trustees an obligation to refund the amount of tuition received in the event of their abandoning their purpose to enter the ministry.

(C.) That free tuition shall not be provided for any candidate for the ministry who indulges in the use of tobacco.

SUMMARY OF EXPENSES.

First term, 14 weeks, Preparatory Department, washing estimated at $7

Second term, 12 weeks, Preparatory Department, washing estimated at $6

Third term, 10 weeks, Preparatory Department, washing estimated at $5

For the Preparatory year

First term, 14 weeks, Collegiate Department, washing estimated at $7

Second term, 12 weeks, Collegiate Department, washing estimated at $6

Third term, 10 weeks, Collegiate Department, washing estimated at $5

For Collegiate year

Tuition and incidental fees must be paid in advance or arranged for with the treasurer, before students are admitted to their classes. Board and washing to be paid weekly. No extra charges, except for chemicals and breakage of working material in the Laboratory, for damage done to the furniture or to the building, for tutoring in preparation for regular class standing, and for special services in case of sickness. Students in the Dormitory are charged two dollars per term as a guarantee against damages to their rooms. The surplus, if any exists, is refunded to the students.

TO PARENTS.

Parents are earnestly requested (1) to note the rule of the Board requiring the payment of tuition in advance; (2) to examine carefully the reports of students sent out at close of each term; (3) to co-operate heartily with the Faculty in enforcing the regulation in regard to visiting the cities.

CALENDAR.

1890.—September 16, Tuesday, Entrance Examinations.
    September 17, Wednesday, Fall Term begins.
    December 24, Wednesday, Fall Term ends.
    Two weeks of vacation.

1891.—January 7, Thursday, Winter Term begins.
    April 1, Wednesday, Winter Term ends.
    One week of vacation.
April 8, Wednesday, Spring Term begins.
June 14, Sabbath 3 p. m., Baccalaureate Sermon.
June 14, Sabbath, 8 p. m., Sermon to the College Y. M. C. A.
