14 PM: Early in the year Joan talked about this plan getting worked on, I was the student rep involved. I know we all need to pr int, the goal is to reduce printing waste. In order to do this we have a plan. We will represent real - time data and information to students while their printing. This includes installing Papercut on all the computers, it's a program that shows everyone their printing history. There are different tabs that shows you how much your behavior in printing has affected the environment. There is also a feature that shows the amount of paper used and counts down how much you print compared to everyone else. You can see the icon here. Here are some pictures of the interface. This will not introduce any new charges for your printing, it just tells people can be aware.

IC: It fails. Come back next year though. Next up is the bill 0010
JL: This bill is a product of conversation happening with SAAC and MCSG bylaws. This bill, coupled with a motion later, reorganizes SAAC within student government. We had some discussions with it becoming a non-chartered org, etc. This is an introduction but I would like to approve it today. It transfers their charter org into the main system
RD: Move to suspend the bylaws to vote on this bill

JL: Second motion, there are 5 orgs that didn't audit. They were told many times over the consequences. So, I move to amend the budget for art history club, masaca, the trafs, and zaboomba.
SN: As a future thing, advisors should be contacted too. That would make it easier for them to fix changes.
