

Jr., Sr. Girls' Football Squad Defeats Underclassmen, 6-0

Upholding the tradition of the past, the junior and senior girls football team, smeared in war paint, once again proved itself superior to the ambitious freshman and sophomore girls in the annual girls' football game Tuesday afternoon on the mall.

The game was a hand-fighting defensive struggle, with most of the pressure on the freshman and sophomore defensive team. The upperclasswomen won the game 6-0, but they did not score until the final play of the game on a short pass from "Boom-Boom" Pfendler to flanker Genie Bollinger.

Jim Shuchman, one of the freshman coaches said before the game, "Even though we're outweighed, we are faster and more organized, and if we can stop "Boom-Boom," we'll blast 'em."

Of "Boom-Boom," coach Dave Posthumus commented, "Much of the credit must go to Karen Pfendler, who is the real inspiration and leader of the team." Dave Peterson, another coach for the winning team added, "Our game will be to run over them with the superior size of our team."

The game was scoreless at halftime. All of the Indians gathered in a huddle and lit up, proving the great shape they're in. (Overheard at the halftime huddle, "Who's got the vodka?")

The versatile offense of the juniors and seniors was put to work in the second half. The end sweeps of "Boom-Boom" and the passing combination of "Boom-Boom" and Judy High were too much for the freshmen-sophomore defense to handle.

Much credit goes to Susan Smith and Jane Ross, defensive and offensive captains of the frosh-sophomore team.

Heroine of the game was Genie Bollinger, for she caught the win-

ning touchdown pass. As Coach Dave Peterson remarked after the game, "We sent in the play we practiced for just such a goal line situation, and we knew we'd have occasion to use it."

Mickey McPherson moves in for the tackle on hard-running senior-junior ace, "Boom Boom" Pfendler, as the upperclass team edged the freshman-sophomore team 6-0 in the annual women's football game. This was the third year in a row that the juniors and seniors won the game.

Interim Geologists Tour Southwest U.S.

Some 35 students are expected to register for the 18-day Geology Interim trip to the American Southwest. Led again this year by Dr. Glock, the group will enjoy a rare opportunity to study geology on location, to travel and understand the "whys and wherefores" of the surrounding country.

The students will leave here Wednesday, January 5, for Lincoln, Nebraska. Then on to Oklahoma City; Amarillo, Texas; Albuquerque, New Mexico; and Flagstaff, Arizona, where they will spend two days. While at Flagstaff they will visit such places as the Sunset Crater lava fields, old Indian dwellings at Walnut Canyon and Wupatki National Monuments, and the Museum of Northern Arizona. After a day and night at the Grand Canyon, they will go to Death Valley via Hoover Dam and Las Vegas—then on to Zion and Bryce National Parks and Salt Lake City. After a day and two nights in Salt Lake City, they will leave for home through the Rockies of Colorado, stopping briefly at Colorado Springs to visit the Garden of the Gods. On January 22 they will return to St. Paul.

In addition to material covered by Dr. Glock and his trip assistants, Pauline Roll, Karen Smith, and Ray Nordin, talks and tours will be provided by National Park Service personnel and by the Director of the Museum of Northern Arizona.

The cost of the Greyhound bus transportation is \$110 for 18 days and 4,662 miles. This must be paid to the business office before November 1 in order to insure space on the bus. Hotels will cost approximately \$60-\$70 and meals are at the discretion of the individual. Students under 21 must receive permission from their parents. Non-

geology students are welcome and encouraged to take this trip. For further information contact Dr. Glock's office and watch for announcements of special film showings and pictures from the Interim trip of two years ago.

AWS AWS Prepares Women For Self-Government

AWS as an organization offers membership for all college women. It is a service group dedicated to cultivating an attitude preparing women to govern themselves throughout their college careers, thereby increasing their ability and desire to fulfill the role of educated and competent women in a democratic society to the highest degree of social, physical, intellectual, and spiritual achievement.

Need for an organization of the structure and nature of AWS has grown from a need for women to accept, adjust to, and develop the powers achieved by them through social, political, and academic equality. The need has shown itself in the desire of the individual for self-study and an evaluation of the college atmosphere in an attempt to achieve mature adjustment. There also is evidence of a need for national expression of representative ideas, desires, and capabilities of individual women students.

Hence it is the belief of AWS that student government increases and strengthens the abilities of individual student leaders, and that student government in the collective body of its leaders can make a valuable contribution to the administration, faculty and student body of any campus through its leaders, their ideas, activities, and achievements. AWS believes that the individual and collective accomplishments of student leaders and student government aid not only the campus during the student's academic life, but each individual in whatever role she may play in the future life of her community, county, state, or nation. AWS is therefore interested in all problems relating to the college campus woman in education, self-government, and future roles.

Glock Goes To Czechoslovakia For Conference

Dr. Waldo S. Glock, director of the Macalester College Tree-Ring Research Laboratory and professor of geology, has left for Brno, Czechoslovakia, where he will give an invited paper at the 4th Czechoslovak International Bioclimatological conference. He was invited by the Czechoslovak Academy of Science as an honored guest.

Dr. Glock will present his paper entitled "Tree Growth Patterns of the American Southwest and Their Geographic Significance" on Monday, October 11, before the Second Plenary Session.

At the close of the conference Dr. Glock will go to Prague to meet with Dr. J. Pazourek, head of the department of plant physiology at Charles University, and Dr. B. Vins of the Forestry and Game Management Institute at Zbraslav.

As chairman of the department of geology from 1948 to September, 1964, Dr. Glock has authored over 100 articles and books on tree growth and climate, tree rings, and dendrochronology, plus a number of articles on geology.

KMCL to Host Annual Party 8:00 In Union

"KMCL on the Spot" is the theme of campus radio station KMCL's annual pizza party to be held on Friday, October 22 in the Student Union from 8:00-12:00.

The events of the evening will include activities to suit the tastes of everyone on campus. For those who like good food, all the pizza one can eat and all the pepsi one can drink will be served for only 85c in the Student Union Grille. A highlight of the pizza party will be a live radio broadcast by one of KMCL's own disc jockeys. For those who are mood music lovers, there will be a record dance held in Cochran Lounge.

Mac Weekly Opinion Poll

Macalester Students Favor Birth Control Pill Distribution

by Del Ehresman and Mike Anthony

The most recent shot-heard-round-the-world, in education circles at least, was the announcement last week that Pembroke College, a women's college in Rhode Island, has announced a new policy—free birth control pills for its women, with parents' approval necessary for those under 21.

Waves of ivy-league shock rolled from college to college with dire predictions of social upheaval. "First the picketing, then this!" screamed irate parents.

We knew that sooner or later the controversy would reach Macalester, so in anticipation of the grand debate, we are proud to proclaim that YES, Macalester students have come out in favor, though not unanimously, of the distribution of birth control pills to co-eds. You see, we took this little poll.

A random sampling of 196 Macalester students was asked this question:

Last week Pembroke College, a women's college in Rhode Island, passed a resolution authorizing its medical center to dispense birth control pills to students desiring them. The stipulation was that students 21 and over could receive them free upon request. Students under 21 could receive them only with the permission of their parents.

Would you favor such a resolution at Macalester?

Students were asked to indicate their class and sex when answering. We received replies from 106 students, or 54% of those polled.

Five alternative answers were stated in the question. Here they are, with the results:

A. Yes, but with no parental permission necessary for any students	29%
B. Yes, a resolution similar to that of Pembroke	30%
C. Yes, but only for those students over 21	9%
D. No, I am against any such resolution at Mac	28%
E. I have no opinion	4%
	100%

Adding the responses to the first three alternatives, we find 68% in favor of some kind of birth control program for Macalester co-eds. Other results were these:

—Men were more favorably disposed than women, with 82% of the males giving a yes or qualified yes. 50% of the females gave similar responses.

—Sophomores scored highest in support of a program with 74%, Freshmen the lowest with 62%. Juniors polled 67% and Seniors 70% in favor.

—The most liberal answer, A, found Sophomores, Juniors, and Seniors in rather close agreement—from 33-40%, with Freshmen having the least support—22%. Freshmen, however, gave the highest nod to response B, the Pembroke program.

The following is the final breakdown on the poll's results, given by both class and sex:

Response	Freshmen		Sophomores		Juniors		Seniors	
	M	F	M	F	M	F	M	F
A.	27%	16%	25%	39%	40%	30%	50%	25%
B.	38	21	42	8	20	20	50	0
C.	8	11	17	15	20	0	0	0
D.	19	47	8	38	20	50	0	50
E.	8	5	8	0	0	0	0	25

Any conclusions to be reached from this data we leave to you, the reader. At least now when someone asks you what the average Macalester student thinks about birth control pills you can whip out the Mac Weekly and tell him.

Next Weekly October 29th

Band, Orchestra, Choir Present Sounds of Music

Filling the air with "sounds of music," the Macalester choir, orchestra and band will present two concerts in the New Music Concert Hall of the Janet Wallace Fine Arts Complex.

The white baton will come down Tuesday, October 26 at 8:30 p.m. to strike the note of the Dedication Concert. Admission is without charge to persons bearing a ticket. To obtain tickets, make requests to Professor Morton in the music department.

Macalester's second program will be the Parents' Weekend Concert, Sunday, October 31 at 2:30 p.m. Admission is without charge and no tickets are necessary for this concert.

Both programs will be identical. The Macalester college choir and varsity choir will sing, directed by Professor Ian Morton, chairman of the Music Department. Professor Butler Eitel will conduct the college orchestra and band.

Soloists singing a choral work are Carolyn Gallagher, Susan Fish, Arturo Steely and Paul Schendel.

Coffee hour in the garden will follow both concerts.

Rings from the BELL TOWER

Engagements
Julie Schmidt, '68 to Larry Milow, Mankato State, '65.
Kathleen Emery, '67 to Michael Mishou, '66.
Linda Sioris, '67 to David Cramer, '67.
