Math 153-02: Midterm Course Evaluations

1. How is the pace of the course so far? Too fast, too slow, or about right.

2. How have you perceived the workload? Too heavy, too light, or about right.

3. How useful are the lectures, examples, and assignments in helping you understand the material in the course? Have any lectures, examples, or assignments been particularly helpful/unhelpful?

4. The labs are a new addition to this course. Are they useful? Would you remove them from the course, leave them as is, or expand their role?
5. What have you liked about the course so far?

6. What has not worked well in the course, and how can it be improved?

7. Overall, what is your assessment of the course so far?

Thank you very much for your feedback!
