To learn more, see the Interpretive Guide: www.theideacenter.org/diagnosticguide.pdf

There were <u>30</u> students enrolled in the course and <u>25</u> students responded. Your results are considered <u>reliable</u>. The <u>83</u>% response rate indicates that results are <u>representative</u> of the class as a whole.

Summary Evaluation of Teaching Effectiveness

Teaching effectiveness is assessed in two ways: **A. Progress on Relevant Objectives**, a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted) and **B. Overall Ratings**, the average student agreement with statements that the teacher and the course were excellent. The **SUMMARY EVALUATION** is the average of these two measures. Individual institutions may prefer to combine these measures in some other manner to arrive at a summary judgment.

<u>Converted Averages</u> are standardized scores that take into account the fact that the average ratings for items on the IDEA form are not equal; students report more progress on some objectives than on others. Converted scores all have the same average (50) and the same variability (a standard deviation of 10); about 40% of them will be between 45 and 55. Because measures are not perfectly reliable, it is best to regard the "true score" as lying within plus or minus 3 of the reported score.

For comparative purposes, use converted averages. Your converted averages are compared with those from all classes in the IDEA database. If enough classes are available, comparisons are also made with classes in the same broad *discipline* as this class and/or with all classes that used IDEA at your *institution*. The *Interpretive Guide* offers some suggestions for using comparative results; some institutions may prefer to establish their own "standards" based on raw or adjusted scores rather than on comparative standing.

Both <u>unadjusted</u> (raw) and <u>adjusted</u> averages are reported. The latter makes classes more comparable by considering factors that influence student ratings, yet are beyond the instructor's control. Scores are adjusted to take into account student desire to take the course regardless of who taught it (item 39), student work habits (item 43), instructor reported class size, and two multiple item measures (student effort not attributable to the instructor and course difficulty not attributable to the instructor).

Student Ratings of Learning on Relevant (Important and Essential) Objectives

Average unadjusted (raw) and adjusted progress ratings are shown below for those objectives you identified as "Important" or "Essential." **Progress on Relevant Objectives** (also shown on page 1) is a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted). The percent of students rating each as "1" or "2" (either "no" or "slight" progress) and as "4" or "5" ("substantial" or "exceptional" progress) is also reported. These results should help you identify objectives where improvement efforts might best be focused. Page 3 contains suggestions about the types of changes you might consider to obtain more satisfactory results. Also, refer to the **POD-IDEA Center Learning Notes** (www.theideacenter.org/podidea/PODNotesLearning.html).

	Importance Rating		Your Average (5-point scale)		ent of s Rating	
	9	Raw	Raw Adj.		1 or 2 4 or 5	
21. Gaining factual knowledge (terminology, classifications, methods, trends)	Essential	4.5	4.4	0%	92%	
22. Learning fundamental principles, generalizations, or theories	Essential	4.4	4.4	0%	92%	
23. Learning to <i>apply</i> course material (to improve thinking, problem solving, and decisions)	Essential	4.2	4.3	4%	88%	
24. Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course	Minor/None					
25. Acquiring skills in working with others as a member of a team	Minor/None					
Developing creative capacities (writing, inventing, designing, performing in art, music, drama, etc.)	Minor/None					
Gaining a broader understanding and appreciation of intellectual/cultural activity (music, science, literature, etc.)	Minor/None					
28. Developing skill in expressing myself orally or in writing	Minor/None					
29. Learning how to find and use resources for answering questions or solving problems	Important	3.2	3.2	29%	42%	
Developing a clearer understanding of, and commitment to, personal values	Minor/None					
31. Learning to <i>analyze</i> and <i>critically evaluate</i> ideas, arguments, and points of view	Minor/None					
32. Acquiring an interest in learning more by asking my own questions and seeking answers	Minor/None					
Progress on Relevant Objectives		4.2	4.2		<u> </u>

Lower = Next 20% (38–44)
Much Lower = Lowest 10% (37 or lower)

Description of Course and Students

Students described the course by rating three items related to "level of academic challenge." Results cannot be interpreted as "good" or "bad"; in general, these ratings have a slight positive relationship with measures of academic achievement. The three items describing your students relate to their academic motivation and work habits and are key factors in developing adjusted ratings.

Course Description	Your Average (5-point scale)
33. Amount of reading	3.1
34. Amount of work in other (non-reading) assignments	3.5
35. Difficulty of subject matter	4.4

Student Description

37. I worked harder on this course than on most courses I have taken.	3.8
39. I really wanted to take this course regardless of who taught it.	2.9
43. As a rule, I put forth more effort than other students on academic work.	4.0

Much Lower = Lowest 10% (37 or lower)

Improving Teaching Effectiveness

One way to improve teaching effectiveness is to make more use of the teaching methods closely related to learning on specific objectives.

- Review page 2 to identify the objective(s) where improvements are most desirable.
- > Use the first column to answer the question, "Which of the 20 teaching methods are most related to learning on these objective(s)?"
- Review the next two columns to answer the question, "How did students rate my use of these important methods?"
- Read the last column to answer the question, "What changes should I consider in my teaching methods?"
- > Beyond specific methods, do the results suggest a general area (e.g., Stimulating Student Interest) where improvement efforts should be focused?

Suggested Actions are based on comparisons with ratings for classes of similar size and level of student motivation. **Consider increasing use** means you employed the method less frequently than those teaching similar classes. **Retain current use or consider increasing** means you employed the method with typical frequency. **Strength to retain** means you employed the method more frequently than those teaching similar classes. More detailed suggestions are in the **Interpretive Guide** (www.theideacenter.org/diagnosticguide.pdf), POD-IDEA Center Notes (www.theideacenter.org/podidea), and POD-IDEA Center Learning Notes (www.theideacenter.org/podidea/PODNotesLearning.html).

Stimulating Student Interest	Relevant to Objectives: (see page 2)
13. Introduced stimulating ideas about the subject	All selected objectives
15. Inspired students to set and achieve goals which really challenged them	All selected objectives
8. Stimulated students to intellectual effort beyond that required by most courses	All selected objectives
4. Demonstrated the importance and significance of the subject matter	21, 22, 23

Your Average (5–point scale)	Percent of Students Rating 4 or 5	Suggested Action
4.0	76%	Retain current use or consider increasing
3.6	52%	Retain current use or consider increasing
4.2	88%	Strength to retain
4.5	96%	Strength to retain

Fostering Student Collaboration

18. Asked students to help each other understand ideas or concepts	29
5. Formed "teams" or "discussion groups" to facilitate learning	Not relevant to objectives selected
16. Asked students to share ideas and experiences with others whose backgrounds	Not relevant to objectives
and viewpoints differ from their own	selected

3.3	44%	Consider increasing use
2.3	20%	
2.2	0%	

Establishing Rapport

2. Found ways to help students answer their own questions	All selected objectives
7. Explained the reasons for criticisms of students' academic performance	23, 29
20. Encouraged student–faculty interaction outside of class (office visits, phone calls, e-mails, etc.)	29
1. Displayed a personal interest in students and their learning	23

4.6	96%	Strength to retain		
5.1	30 /8	consider increasing		
3.7	56%	Retain current use or		
3.0	J270	consider increasing		
3.6	52%	Retain current use or		
4.0	80%	consider increasing		
4.0	80%	Retain current use or		

Encouraging Student Involvement

Encouraged students to use multiple resources (e.g. data banks, library holdings, outside experts) to improve understanding	29
14. Involved students in "hands on" projects such as research, case studies, or "real life" activities	29
19. Gave projects, tests, or assignments that required original or creative thinking	29
11. Related course material to real life situations	23

2.3	4%	Consider increasing use
2.8	32%	Consider increasing use
3.3	48%	Consider increasing use
4.5	92%	Strength to retain

Structuring Classroom Experiences

10. Explained course material clearly and concisely	21, 22, 23
6. Made it clear how each topic fit into the course	21, 22, 23
12. Gave tests, projects, etc. that covered the most important points of the course	21, 22
3. Scheduled course work (class activities, tests, projects) in ways which	Not relevant to objectives
encouraged students to stay up-to-date in their work	selected
17. Provided timely and frequent feedback on tests, reports, projects, etc. to help	Not relevant to objectives
students improve	selected

4.0	80%	Retain current use or consider increasing
4.3	92%	Strength to retain
4.6	92%	Strength to retain
4.2	84%	
4.6	84%

The details on this page are of interest primarily to those who want to confirm scores reported on pages 1–3 or who want to determine if responses to some items were distributed in an unusual manner.

Converted Averages are reported only for relevant learning objectives (Important or Essential –see page 2) and other items for which comparisons were provided.
