How our CSA works:

Untiedt’s CSA box pickup lasts 17 weeks, starting in mid-June. We offer a full share or half share option. Full-shares will feed a family of four to six, while half-shares will feed a family of two to three. Payments are due at the time of registration. Several pickup locations are available and can be viewed on our website.

Over 50 different crops are grown for our CSA Shareholders, and fruit is included in the price of the CSA! You can expect to receive a minimum of at least 7-8 different types of produce in your share each week.

Each week your share is delivered to your chosen location, and must be picked up that day. Shares cannot be held for a week or switched to alternate days. Arrangements must be made at least 48 hours in advance to have drop off location changed for a week. There is a possibility that fall shares may be added depending on the growing season. This will be determined in September of each year, and members will be invited to sign up for the Extended Fall Season for an additional cost.

Full Share: $750           Half Share: $425

FAQs

Q. Do I have to pay the cost all at once?
A. Yes. We use these funds for our start up costs; like seeds, labor and transportation.

Q. What happens if I am not able to get to my pickup?
A. Unfortunately, we are not able to hold or credit shares. If you are going to miss a pickup, we recommend having someone pick up your produce. If your location needs to be changed for a week, we must be notified 48 hours in advance.

Q. Can I select which items I would like to receive?
A. No. All shares are packaged alike.

Q. Will I always have food in my CSA box even if the season doesn’t cooperate?
A. Yes, there just might not be as much of a certain item. We work hard to guarantee that your boxes will always contain a minimum of 7-8 different items each week.

Q. Can I visit the farm?
A. Yes, there are a few farm events each season. CSA members are encouraged to attend and learn about the farm and our growing practices.

Q. Are you organic?
A. We use many organic techniques, but are not 100% organic.

About Us

We’ve farmed the same land for over 40 years, and work to maintain and improve healthy soils so we can continue this third generation family farm for years to come.

Everyone at Untiedt’s Vegetable Farm is humbled to work beneath our logo which states “We Grow For You.”

We genuinely acknowledge the following:

1. We do believe in, and respect, an old Native American adage: “We have not inherited these lands, but borrowed them from our grandchildren.”

2. Our support from you, our customer, through your purchase is your vote of confidence in our products and philosophy.

3. Our successes are, and will continue to be, shared with our community. Be they monetary or in-kind, we believe in “paying it forward.”

4. Our quests for higher technology will never ignore land stewardship concepts, which are so dear to us.

5. Our standards dictate that education be as much a farm product as the flowers, fruits and vegetables produced on our farm. To be a positive, contributing force in our industry, sharing our knowledge of the land with anyone who is curious.

Check out our website to learn more about our farming philosophy and growing techniques.

Waverly, Minnesota

We are a family farm, on which land stewardship values and new technologies join; yielding the finest quality, sustainably produced fruits and vegetables.

We are open to, and encourage, farm visits. Our farm is in Waverly, Minnesota. Only 45 minutes outside of the cities. Look on our website for open house dates to be scheduled as our growing season continues. We consider education to be one of our most important farm products.

What is a CSA?
Community Supported Agriculture (CSA) consists of a group of people who pledge at the beginning of the season to support a farming operation; resulting in a relationship where the grower and consumer share the farming risks and rewards.
For example, if frost bites the apple trees in April, the CSA box may not be as apple abundant in September. But if the weather conditions are ideal, the CSA box you receive each week will reflect that.

Why are we different?
Fruit is included in the price of a share!
Each week your share consists of a minimum of 7-8 different types of fruits and vegetables.

We use high tunnels, which lengthen the growing season on both the front and back end of the season.
