

Larsen and Marx An Introduction to Mathematical Statistics

1. Introduction.

- A Brief History.
- Some Examples.
- A Chapter Summary.

2. Probability.

- Sample Spaces and the Algebra of Sets.
- The Probability Function.
- Conditional Probability.
- Independence.
- Combinatorics.
- Combinatorial Probability.
- Taking a Second Look at Statistics (Enumeration and Monte Carlo Techniques))

3. Random Variables.

- Binomial and Hypergeometric Probabilities.
- Discrete Random Variables.
- Continuous Random Variables.
- Expected Values.
- The Variance. Joint Densities.
- Combining Random Variables.
- Further Properties of the Mean and Variance.
- Order Statistics.
- Conditional Densities.
- Moment Generating Functions.
- Taking a Second Look at Statistics (Interpreting Means)

4. Special Distributions.

- The Poisson Distribution.
- The Normal Distribution.
- The Geometric Distribution.
- The Negative Binomial Distribution.
- The Gamma Distribution.
- Taking a Second Look at Statistics (Monte Carlo Simulations)
- Appendix 4.A.1: MINITAB Applications. Appendix 4.A.2: A Proof of the Central Limit Theorem.

5. Estimation.

Estimating Parameters: The Method of Maximum Likelihood and the Method of Moments.

Interval Estimation.

Properties of Estimators.

Minimum-Variance Estimators: The Cramer-Rao Lower Bound.

Sufficiency.

Consistency.

Bayesian Estimation

Taking a Second Look at Statistics (Revising the Margin of Error)

Appendix 5.A.1: MINITAB Applications.

6. Hypothesis Testing.

The Decision Rule.

Testing Binomial Data- $H_0: p = p_0$.

Type I and Type II Errors.

A Notion of Optimality: The Generalized Likelihood Ratio.

Taking a Second Look at Statistics (Statistical Significance versus "Practical" Significance)

7. The Normal Distribution.

Comparing $(\bar{Y} - \mu) / \sigma / \sqrt{n}$ and $(\bar{Y} - \mu) / S / \sqrt{n}$

Deriving the distribution of $(\bar{Y} - \mu) / S / \sqrt{n}$.

Drawing inferences about μ .

Drawing inferences about σ^2

Taking a Second Look at Statistics ("Bad" Estimators).

8. Types of Data: A Brief Overview.

Classifying Data.

9. Two-Sample Problems.

Testing $H_0: \mu_x = \mu_y$: The Two-Sample t Test.

Testing $H_0: \sigma_x^2 = \sigma_y^2$ -The F Test.

Binomial Data: Testing $H_0: p_x = p_y$.

Confidence Intervals for the Two-Sample Problem.

Taking a Second Look at Statistics (Choosing Samples)

Appendix 9.A.1: A Derivation of the Two-Sample t Test (A Proof of Theorem 9.2.2.).

Appendix 9.A.2: Power Calculations for a Two-Sample t Test. Appendix 9.A.3: MINITAB Applications.

10. Goodness-of-Fit Tests.

The Multinomial Distribution.

Goodness-of-Fit Tests: All Parameters Known.

Goodness-of-Fit Tests: Parameters Unknown.

Contingency Tables.

Taking a Second Look at Statistics (Outliers)

Appendix 10.A.1: MINITAB Applications.

11. Regression.

The Method of Least Squares.

The Linear Model.

Covariance and Correlation.

The Bivariate Normal Distribution.

Taking a Second Look at Statistics (How Not to Interpret the Sample Correlation Coefficient)

Appendix 11.A.1: MINITAB Applications. Appendix 11.A.2: A Proof of Theorem 11.3.3.

12. The Analysis of Variance.

The F Test.

Multiple Comparisons: Tukey's Method.

Testing Subhypotheses with Orthogonal Contrasts.

Data Transformations.

Taking a Second Look at Statistics (Putting the Subject of Statistics Together---The Contributions of Ronald A. Fisher)

Appendix 12.A.1: MINITAB Applications. Appendix 12.A.2: A Proof of Theorem 12.2.2.

Appendix 12.A.3: The Distribution of When H_1 Is True.

13. Randomized Block Designs.

The F Test for a Randomized Block Design.

The Paired t Test.

Taking a Second Look at Statistics (Choosing Between a Two-Sample t Test and a Paired t Test)

Appendix 13.A.1: MINITAB Applications.

14. Nonparametric Statistics.

The Sign Test.

The Wilcoxon Signed Rank Test.

The Kruskal-Wallis Test.

The Friedman Test.

Taking a Second Look at Statistics (Comparing Parametric and Nonparametric

procedures)

Appendix 14.A.1: MINITAB Applications.

Appendix: Statistical Tables. Answers to Selected Odd-Numbered Questions.

Bibliography.

Index.
